About Buzzpark

Since our foundation in 2001, we have been active in the softplay and indoor playground industry. Our main aim is safety and quality for our products. We have TUV certificate. We have standard products as well as custom make production.

Our indoor playgrounds can be used in shopping malls, hotels, restaurants and cafes. Indoor playgrounds make it possible for parents to have their meals and shop comfortably while their offsprings have fun playing in the playground.

We believe in specializing in one field we manufacture only indoor playgrounds and trampolines.

With their dashing colours and moving features, our products are effective in childrens' physical and mental development. While playing in our ball pits children forget how time flies by.....

Apart from indoor playgrounds we produce multicoloured plastic balls for indoor playgrounds.

Kind Regards
Buzzpark
